

The forced airing of an anti-Kerry pseudo-"documentary" by Sinclair Broadcasting is a blatant attempt to skew this election. Again, it is media consolidation at its worst.

If Sinclair wishes to use our public airways free of charge, they should be compelled by law to broadcast both sides of an issue, leaving the viewer to decide for himself based on the presentation of fact, not extremist fiction.

The license renewal process obviously needs to be revamped to include an extensive study of the practices and possible abuses perpetrated during the prior licensed period, and practices of biased programming should result in your denying a renewal to the offending station.
